WE SPECIALISE IN SAVING YOU MONEY

We have formed a team of specialists to find solutions to all your energy related problems. All our products and services are aimed at helping you to:

- * **save** money and energy,
- * **reduce** green house gas emissions, and
- * **demonstrate** environmentally responsible corporate behaviour.

Here's what we do.....

Power Factor Correction

PFC is helping to protect the environment by reducing reactive power and emissions of greenhouse gases, saving resources and providing an active contribution to a better climate. By increasing your energy efficiency through installation of power factor, you **save energy used with a pay back period of usually less than 24months.**

SkyCool Roof Coating

Let this specialised thermal coating eliminate solar heating before it enters building. **Better than all forms of insulation, it actually draws heat out of the building** rendering its interior cooler than ambient air. Thus reducing air conditioning plant and running costs by approximately 30%—50%.

Light Eco

A proven energy efficient cost saver for fluorescent and hi bay lighting. Light Eco is cutting energy bills by up to 30% achieving a payback of 18 to 24 months. There are over 40,000 installations worldwide with a **guarantee of savings of 25% or your money back.**

Preventative Maintenance

Using infrared cameras to identify any faults/risks/potential problems in switchboards, cabling, connection and mechanical equipment. Minimise/prevent shutdowns before they happen. **Ensuring the safety and reliability of electrical systems and improving the bottom line of your business.**

We also perform energy audits, energy management, energy contract negotiations, standby generation, co-generation and demand management. **Visit our web site at www.kvarconnect.com.au for more information.**

What should I do?

For an obligation free energy appraisal of your premises, please call our office on (03) 5674 2133 or email us at sales@kvarconnect.com.au.

“Save money, save energy, reduce greenhouse gas emissions and demonstrate environmentally responsible corporate behaviour.”
